BINKS TROPHY AA 1600 & 4400 Air Assisted Airless Spray Guns

The new Binks Trophy AA combines industry experience, design, and technology in our all-new Air Assisted Airless spray gun. Designed to handle the toughest of applications, the Trophy AA is purpose built to maximize spray quality, increase efficiency, reduce downtime, and be environmentally responsible, while providing the light-weight, ergonomically sculpted fit and feel that operators demand.

A new range of AA10+ Air Caps as well as an innovative replaceable tip seal, places the Binks Trophy AA firmly at the fore-front of Air Assisted Airless spray gun design. Having a low trigger-force enhances control while significantly reducing operator fatigue and the chances of RSI.
